## SUMMARY

Staff Backend Engineer with 8+ years experience designing high-throughput distributed systems, microservices, and event-driven architecture

## TECHNICAL SKILLS

Languages: TypeScript, Python, Go, SQL

Frameworks: NestJS, Express, FastAPI, Next.js

Databases: PostgreSQL, Redis, MongoDB

Tools: Docker, Kubernetes, AWS, BullMQ, Git, Terraform

Other: Microservices, Event-Driven Architecture, Distributed Systems, CI/CD

## EXPERIENCE

TechFlow Systems - Senior Backend Engineer (San Francisco, CA)

2021-03 to Present

- Architected event-driven microservices processing 10M+ daily transactions using NestJS and PostgreSQL.
- Implemented background job processing infrastructure with BullMQ and Redis, slashing queue latency by 45%.
- Led database optimization and partitioning strategy, improving query response times by 3x.
- Mentored a team of 6 engineers and drove engineering best practices.

CloudScale Inc - Software Engineer (Austin, TX)

2018-06 to 2021-02

- Built scalable REST APIs and services supporting 500k active users in TypeScript and PostgreSQL.
- Automated deployment workflows using GitHub Actions and AWS ECS.

## EDUCATION

University of Texas at Austin

Bachelor of Science in Computer Science | 2014-08 to 2018-05 | GPA: 3.8

## PROJECTS

Relay Outreach Engine (TypeScript, NestJS, PostgreSQL, BullMQ, OpenAI)

- Built high-performance cold outreach engine with automated AI research and email generation.
